**Fields of Application**

The in-line pumps are designed for:

Water supply and boosting,  
Watering, sprinkling and dewatering,  
Filling and discharging of tanks,  
Circulating of hot and cold water,  
In central heating and air-conditioning installations,  
Circulating in swimming pools,  
Liquid transfer applications in industry, agriculture, etc.  
Pumping of clean and sea water in ships.

**Design Specification**

The INM pumps are single-stage centrifugal pumps of non-self-priming type fitted with standard motors and mechanical shaft seals.

The nominal flow rates of the pumps comply with the DIN 24 255 standards.

Pump flanges sizes according to EN 1092, PN 16. The dimensions of the suction and discharge ports are identical. Both pump flanges have pressure gage tapings.

Single entry, closed impeller is hydraulically thrust compensated and dynamically balanced.

A drain plug is fitted in the bottom of pump housing.

The motor shaft is passed into the pump shaft for coupling and no need to use any coupling for the system.

**Bearings**

For INM series pumps, the motor shaft and pump shaft are passed into each other. The axial and the radial loads are carried by the bearing inside the motor. There is no need to use extra bearing for the pump. For high powers, a coupling system is used between the motor shaft and pump shaft.

**Technical Data**

Suction Flange	: DN 40 - DN 200
Discharge Flange	: DN 40 - DN 200
Operating Pressure	: 10 bar
Operating Temperature	: -25 – 120 °C
Flow Range	: 2 – 520 m <sup>3</sup> /h
Head Range	: 2 - 105 m
Speed Range	: 900-3600 rpm
